

KICKSTOPS®

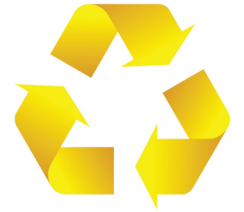

CARGO RESTRAINT DEVICE FOR ENCLOSED TRAILERS

The KICK STOPS Cargo Restraint Device works to secure pallets inside enclosed trailers, ocean containers, and intermodal transfers by eliminating pallet movement. Not allowing pallets to walk in transit prevents shifting, toppling, and damages. The KICK STOPS device is the most cost-effective, time-saving and sustainable freight securement system in the industry.

THE SUSTAINABLE SOLUTION

KICK STOPS are a sustainable device that takes the place of all non recyclable dunnage to secure products in an environmentally conscious manner. KICKS STOPS are 100% recyclable, made with the Mini Mill process which uses 100% scrap and currently, every KICK STOPS device is made up of 70%-100% scrap.

REDUCE DAMAGE

- Eliminates pallet movement
- Decreases damage, shifting/toppling, & rejected loads
- Works with all wood and plastic shipping materials

SAVE TIME

- Companies that use KICK STOPS cut their load & unload times in half
- No tools needed
- No other dunnage needed

SAVE MONEY

- Eliminate expensive dunnage, storage, & disposal
- Decrease labor costs

Keeping your freight secure one KICK at a time.

INSTALLATION INSTRUCTIONS

PLACEMENT

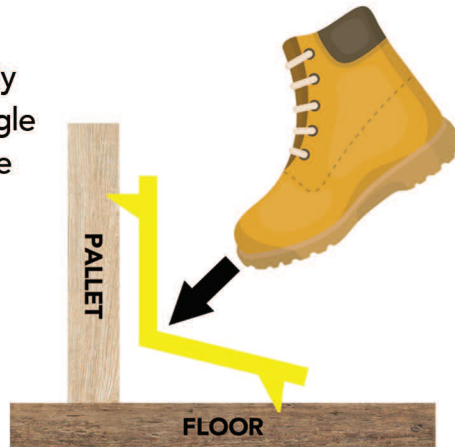

*The upper face of the KICK STOPS device MUST be parallel to side of the pallet for installation. If the upper face is at an angle to the pallet for installation, the KICK STOPS device will be compromised and will not work.

INSTALLATION

Once device has been placed correctly against pallet, firmly KICK into the angle of the device to pin the points into the pallet and wood floor of vehicle.

NOTE: Penetrates the floor only 1/16th of an inch

*Pallets MUST be pushed against side walls, conjoining pallets and bulkhead.

REMOVAL

Lifting the pallet with a forklift or pallet jack will dislodge the KICK STOPS device from the floor. If only one side is dislodged, pull out remaining points by hand.

KICK STOPS will fall to the floor once dislodged.

If KICK STOPS are still connected to pallet, simply pull out by hand.

CAUTION: This product contains sharp points. Careful handling is required. KICK STOPS are intended for use on wood and plastic surfaces. DO NOT attempt to use on metal.
